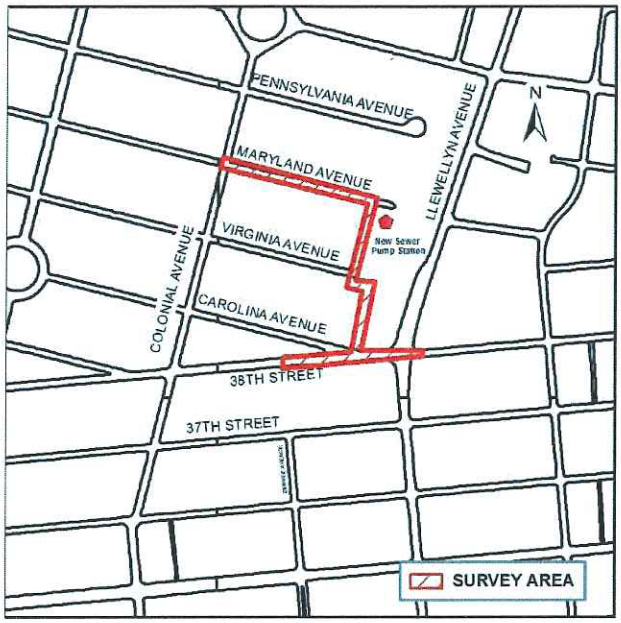
Sanitary Sewer and Water Improvements Planned in Colonial Place

Dear Valued Customer,

The City of Norfolk's Department of Utilities is planning a project to replace and improve aging sanitary sewer and water infrastructure in the Colonial Place neighborhood (project area shown on the map to the right).



This multi-phased project will include survey, design and construction of a new sanitary sewer pump station and new sanitary sewer and water pipes, as well as resurfaced streets.

The City's consultant, Johnson, Mirmiran & Thompson (JMT), has been hired to complete the survey and design for this project. Over the next few months, survey crews may need to access the exterior of your property in order to identify property boundaries, building footprints, and easement locations. At no time will the surveyors request to enter your home.

This project is currently in the design phase and construction has not yet been scheduled. We will provide you with an update before construction begins. If at any time you have questions or concerns, please contact the project manager, Kevin Frederick, at 664-6734.

Sincerely,

Kristen M. Lentz, P.E.
Director of Utilities
