UPDATE

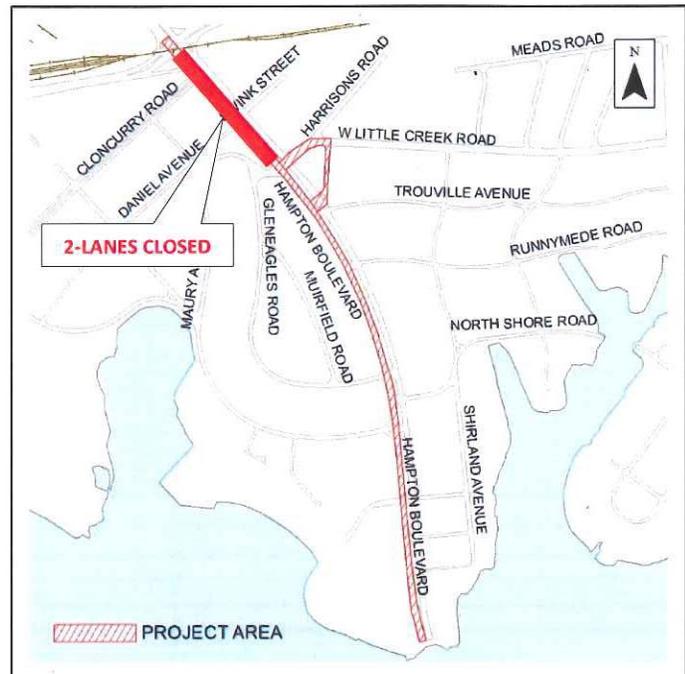

Hampton Boulevard Water Transmission Main Improvements Additional Southbound Lane Closure Required

Dear Valued Customer,

Due to unforeseen underground utility conflicts, it will be necessary to close a second lane around-the-clock on southbound Hampton Boulevard from December 5th to the end of the month in order for the new water main to be installed safely.

The Hampton Boulevard water main project will replace approximately 4,300 feet of 24-inch pipe in the project area shown to the right, but it is our hope that the dual lane closure will only be necessary for this one section of the project.

If you have any questions regarding this project, please do not hesitate to contact the City's on-site construction inspector, Gary Kimber. He can be reached by cell phone at 646-1659 to respond quickly. You may also contact the project manager, Kevin Frederick, at 664-6734.

The Department of Utilities appreciates your continued patience during this project which will enhance water service for many years to come.

Sincerely,

Kristen M. Lentz, P.E.
Director of Utilities
